

# GREEN HYBRID 32

## Tendering text for Green Hybrid 32

### **MATERIALS AND PRODUCTS:**

- Hybrid grass on a mesh such as "Green Hybrid 32"
- Blades of grass: 100% polyethylene (PE) Mono Filament
- Colour: Natural grass green
- Blade height: 18 mm (+/- 10%)
- Blade weight: 441 + 233 g/m<sup>2</sup> (+/- 10%)
- Mesh hole size: 26 x 64 mm (+/- 10%)
- Grid structure: SBR - Latex
- Total weight: 974 g/m<sup>2</sup> (+/- 10%)

### **INSTALLATION:**

- The hybrid grass is installed on an already established/sown lawn.
- As far as possible, ensure the rolls are rolled out in the same direction so the blades are pointing in the same direction.
- The edges of the rolls should be cut off before fastening.
- The hybrid grass is fastened at the edges with bio pegs that are at least 10 cm long.
- 1 peg should be placed every 40 cm at the edges.
- The hybrid grass should be tightened up before being finally laid.
- The centre is fastened with bio pegs that are at least 10 cm long.
- 6 pegs per/m<sup>2</sup> (distance approx. 40 x 40 cm)
- Rolls are joined using the supplied sewing thread.

(Also read the installation instructions from the manufacturer)
